Coolant 2 Part Kit Flush & Treatment

“For Professional Use ONLY”

True Brand® **Cooling System Kit** is formulated to breakdown and **suspend** rust, scale and sediment. This non-acid-base product needs no neutralizer and is compatible with plastic and aluminum.

True Brand® contains a unique corrosion and rust inhibitor technology that enhances protection of cooling system metals such as iron, aluminum, copper and solder. It contains antifoaming agents and provides **additional protection** to water pumps.

Truth - Application / Directions

Flush:

- Allow system to cool before removing radiator cap.
- Remove radiator cap, Pour True Brand® Coolant Flush into Radiator.
- Run engine at operating temperature for ten to fifteen minutes.
- Flush Coolant System with a Fluid Exchange Machine. Refer to machine's instructions for additional details.

Treatment:

- Add True Brand® Cooling System **Treatment** to cooling system at the time of a service or at anytime additional rust and corrosion **protection** is desired.

Truth - Features / Benefits

- Flush
- Non-Acid
- Requires NO Neutralizer
- Can be used on radiator plastic and aluminum components
- Highly effective at removing scale and sediment from system

Treatment

- Increases protection of water pump and reduces potential damage to pump surfaces
- Proven to increase corrosion inhibiting performance of treated coolant
- Strengthens the systems surfaces from corrosion damage for an extended period
- Compatible with all types of coolant
